OfficeSpace

Bardex Corporation has increased in size once again. Having almost outgrown our current offices, management decided that the future of Bardex lies in continued expansion and that we therefore needed more design and offshore experts. As the employees of Bardex Corporation are always thinking of new ways to solve problems, it was also decided that remote offices and additions to our engineering staff will improve lead time and provide better overall customer support. Bardex now has design offices in and Ventura, California.

The Ventura, California office opened earlier this year and currently has four engineers. The Elkhart, Indiana opened in 2012 with two seasoned engineers. Both offices have state-of-the art IT communications with our Goleta head office

The primary thought behind this move was to enable us to hire engineers from a group outside of the main office in the Santa Barbara, CA.

From the outside, both places appear to be unassuming office buildings, but from these will come the new designs that will skid and moor customers' equipments for a long, long time.

Ventura, California

Elkhart, Indiana

We are finishing up a couple of the jobs we started a few months ago. The pictures are of a large job for the Gulf of Mexico which includes the largest Chain Jack Bardex has ever produced having a pull-in capacity of over 1200 metric tons. The cylinders are for gripper jacks that range in capacity from about 60 metric tons to over 400 metric tons.

Nine models of gripper jacks and restraints are being produced for this project.

2013 Exhibitions

2013 Aberdeen, UK September 3-6

The Aberdeen Exhibition & Conference Centre expects close to 50,000 attendees who have the opportunity to visit with over 1500 vendors, hear technical conferences presented by the oil and gas industry's experts, and talk directly to product specialists and technical staff. If you are planning on attending please stop by stand number 3A158 and see us.

Bardex at

Bardex was in our usual spot at the 2013 OTC show. Flanked by other big names in the industry, we were in good company.

As a group of Sales and Senior staff we answered many questions, received a number of inquiries, and hosted impromptu clarification meetings with existing customers, as well as informative meetings with prospective customers.

According to the number-counters attendance for the show, there were approximately 105,000 visitors. They say this is a thirty-year high, second highest attendance record, and up 17% from last year.

Our Bardex booth was very active, handing out many brochures, and provided a presentation of our products and recent projects on a couple of large-screen televisions.

This is our Company's "local" show and we always enjoy taking part in answering visitors' questions about our products and solving our customers' needs. Look for us again at OTC 2014 next May in Houston.
